

## **DAY -09, DAILY REPORT, 18 -11 -2021 (THURSDAY)**

Today, I got an experience with my mentor abin. Firstly, i wake in the morning and brush up my teeth, and get read to the office or company and the cab came at 9.30 am and i went to the office at 9.45 am and i had my first session of explaining all definition like front end developer, back end developer, cloud engineer, Css, Html, Javascript etc. and after that i had gone through the html tags commonly used it has (<HTML>...</HTML>) tag that is used for the entire HTML document. And the second one is the (<HEAD>...</HEAD>) tag that is used for The head or prologue of the html document. And prologue means it has logical programming languages. And the third one is the (<BODY>...</BODY>) tag that is used for all the content in the HTML document. And the fourth one is the (<TITLE>...</TITLE>) tag that is used for the title of the document. and the fifth one is the (<H1>...</H1>) is the tag that is used for the first level heading text size. And the sixth one is the tag (<H2>...</H2>) that is used for second level heading. And the seventh one is the tag (<H3>...</H3>) that is used for third level leading means in the next paragraph. And the eight one is the (<H4>...</H4>) that is used for fourth level heading. And the ninth one is the (<H5>...</H5>) that is used for fifth level heading. And the tenth one is the (<H6>...</H6>) that is used for sixth level heading. And the eleventh one is the (<P>...</P>) that is used for is to make a new paragraph. And the twelfth one is the (<BR>) tag is the line break and this will

show a blank line. And the thirteenth one is the (<HR> tag that is used for horizontal lines on the page. And the fourteenth one is the tag (<!-->) tag that is used to commit you to write in the middle will not show up on the page when it is viewed. And the fifteenth one is the tag (<A href=>...</A>) that is used to link the A =anchor links the current HTML file to another file. And the example is the <A href="menu.Html"> is the tag that is to go back to the main menu </A> and this to display the file which is the name in the quotes. The link goes to another page on the internet. And the sixteenth one has the tag <DL> is used for the definition list at the beginning. And the </DL> at the end. And the seventeenth <DT> tag is for each definition term in the list and the use of (<DD>) tag is for each "Definition" of each term. The definition will be indented. And the tag <DT> is the tag that is used for the definition term. And the <IMG SRC="image.gif"> is the tag that is used for inline images to put the name of the graphic (.gif or .jpg) in the quotes. And the tag <B>...</B> that is used for to Bold text in the document. And the tag <I>...</I> that is used for Italic form is to make the text in curve writing letters or Text italic. And the <font size="3">...</font> is the tag that is used to change the size of the font. It is better to use the header tag to make the font. It appears bigger. And the <table> tag that is used for creating a table or start. And next one is the <TR> tag that is used for creating a table row. And the next one is the <TD> tag that is used for creating a table element etc. after that in the morning session about the problem solving solutions and it has the great thinki3

ng ability to be a good thinker and solve the problem solving questions in a good way. Thank you, that's all about today.
